

Technical analysis

Representation of principal contractors

We provide our technical expert services to the principal contractors and to this end, we carry out diagnoses and feasibility studies, costs and deadlines assessments.

As part of our task, we:

- ☑ look over buildings,
- ☑ recommend which alteration works could be done,
- ☑ define specifications,
- ☑ take care of the call for tenders,
- ☑ compare proposals and estimates,
- ☑ select service providers with the principal.

We take over the leadership of technical, administrative, legal and financial aspects of these operations.
